Healthcare is on the cusp of a major transformation that is beginning to affect both how we provide and pay for care. Thibodaux Regional is deeply committed to ready itself for this new future, and we invite you to join us and learn more. At this summit, we'll all learn from national leaders on how they are guiding healthcare institutions through this transition. Specifically, you'll learn:

- To better understand the risk and opportunity of entering into a risk arrangement.
- How to better manage rising-risk patients.
- The secrets to better manage an employee population.
- How to leverage care transformation to lower cost, improve clinical outcomes, and provide a better patient experience while improving physician engagement.
- The right VBP payment for your health system given your commitment to quality and risk tolerance.
- Which MACRA path is right for you and why: APM or MIPS?
